Introduction

Dear Blockchain Believer,

"Our initiative are aiming to develop a complete solution for an eco system that host the usage and life cycle of a crypto-currency from time issuance, hold, Exchange and then spend on real products and services, till we reach the day that Cryptocurrency owners could use it for grocery shopping level, we hope with that solution the inflation rate that could impact Crypto user will be reduced from time to time".ConnectDApp Portfolio, will be served under one Application Platform Andriod/IOs/ etc....and then user will navigate between products, Was it one of your dream to have one Mobile Platform that facilitate all kind of daily usage of Mobile Apps including enhanced security and privacy, was it also needed to be part of Cryptocurrency and being able to Mine using your mobile device and also ability to use mined balance for products and service payment, was it part of your dream to send your need suggestion that you wish to find it one day and have a solid team working on it

It's time to decentralise your information.

Ahmed Omar I CEO

Connect Crypto Currency with Live Products.

We are a Team of an IT entrepreneur who believe in Blockchain Technology and Decentralisation Concept for giving better user experience and increase privacy while giving users a space to their online products and services inside ConnectDApp Eco System, while they could use ConnectDApp Tokens for getting real products and services and use their Mobile Device to Mine ConnectDApp Core Coin.

*Securing Customer
Crypto Funds is our
Objective.*

*Ahmed Nasser | Blockchain Directoy of
ConnectDApp*

Our Solution for You

ConnectDApp Core Blockchain will not be accessible using Private Keys that is custody free "Stored in Mobile Device" but will also include 2FA that is associated and Required while transfer Coin Ownership from a User for Another. ConnectDApp architecture will support concept of SSO for all applications as well as Blockchain Users while each end every Mobile Device will be one node of Blockchain. FPGA Mining, ASIC, PC, GPU, etc.. Mining will not be supported by ConnectDApp Core Blockchain network as it will be only Mobile Friendly.

Crypto Funds will be spent through Mobile Device Owner

Custody Free, Private Keys will be stored on Your Google Drive Account,

Accessible any time securely

ConnectDApp will work in availing new Job opportunities that was never been introduced to the Market and increase the Freelancing Opportunities for some sectors that was never handled by Public before, Ex: Confirming Letter of Credits for International Business Trade was Never done before using Private Sectors, so we are going to use Consensus mechanism for Shipment Delivery using App Users that are willing to work as Validators for a Percentage of Deal Cost.

Our Product

ConnectDApp will avail Connecting E-Commerce world to be injected into ConnectDApp Eco System. ConnectDApp will avail Connection to Visa/Master Card network so that User will be able to use their Crypto Balance into daily Payment Operations Globally.

ConnectDApp will give the user the option to store their private data on their devices and only shared based on their preference level.

Exchanging ConnectDApp Token and ConnectDApp Core Coin will be available with FIAT and Other Cryptocurrencies inside ConnectDApp Eco System so that will be easier for all people to start using ConnectDApp Products and Services easily.

Tokens creation over ConnectDApp Core Blockchain network will be available and will be availed for Exchange and Payment operations of ConnectDApp Products and Services. ConnectDApp will have a Solution of Inheritance issue for Coin owners when they passed away, will create an consensus operation mechanism to let right person to validate the inheritors based on Local Court judgment and consensus of Local ConnectDApp users for a percentage of validated amount with a number of validations.

What You Need to Know

Technically, we will apply the same concepts that was firstly applied in Digital Currency in Bitcoin from Consensus, Decentralisation, Immutability and temper evidence, also we will add account concept of Etheruem, then we will add more advantage of know your customer concept inside blocks so that only one person can validate ownership of Cryptocurrency regardless of ownership of Private Keys, so in fact it can never be stolen unless completing the cycle of owning same device that hold application and also apply 2 Factor authentication.

Financially, ConnectDApp COD Token and ConnectDApp COC Coin will increase the adaptability of Cryptocurrency of real products and services that are going to be delivered through ConnectDApp Platform, Basically Customer will able to use CryptoCurrency in Groecory Shopping, Car Rental, House and Hotel Renting, Tourism Activities Booking, Payment of Government Services, Asking for Freelancing Services and Accepting Payment of Freelancing Services, Buying and Selling New/Used Goods and Products, B2B Payment between Companies, School and KG Service Payment, International Letter of Credit and etc..

New Added Security to Blockchain

So how is it done?

Simply we are giving a hand on Financial Freedom and increasing possible growth of International Economics by completing the cycle of Payment process using crypto currencies and increasing the affordability of normal users to handle his/her daily needs using crypto from earned some through mining and direct trading. So, at the end while installing ConnectDApp and Holding COC and COD the power will be in your hand. Transaction time will be the key for ConnectDApp Core Coin Blockchain as it will be used in instance payment for shops. ConnectDApp Token COD Holding will be used as a Mining Power for ConnectDApp Core Coin COC and Min Staking will be applied. KYC Concept will be used as an important part of hashing algorithm used for block creation but with an anonymity feature so, in fact only one user with ownership of mobile app can confirm transactions of a Coin with accessibility of 2FA feature before confirming transaction moreover not only Private Key will be used for confirming ownership of Coins so that at the end increasing security of Blockchain users. Crypto Market Cap and Exchange Market will be availed through ConnectDApp so listing Tokens will lead to listing same in Exchange Market so it will ease crypto currency user communication and transactions.

Real Time Access to your funds.

Mining Power of COC Coin will require Proof of Stack COD Tokens.

Proof of Stack Levels:

- Basic Mining Power: 1000 COD
- Advanced Mining Power: 10000 COD
- Super Mining Power is 50000 COD
- VIP mining power is 200,000 COD

Total Market Supply of COC is 100M, 50% will be given for Miners based on their POS, Initial Price of COC is 5 USD, not including incentives that is given upon Smart contract execution. CRC10, CRC20 Smart Contract Facility will be available on top of COC Mainnet. Smart Contract Execution fees will be 50 COC. All Connect Crypto functions will apply Custody Free Concept where the user will keep their Private Keys and will be updated on his own Google Drive. Only the device that have ConnectDApp installed on it will have access to spend COC Coins. Our initiative are aiming to develop a complete solution for an ecosystem that host the usage of a cryptocurrency from time issuance and hold, till spend on real products and services.
